White Canes for children, school and pre-school ages

All Comde-Derenda Children's Canes (Series KS) are made from a heavy-duty aluminum alloy which is also used in the aerospace industry. All canes come with a skin-friendly beechwood handle with finger grooves and a light-reflecting surface. A range of colors is available for personalizing your cane. All Comde-Derenda cane tips (or other tips with M8 screw thread) can be used with these canes.

In lengths from 90 to 140 cm our Children's Canes consist of two parts that can easily be assembled. The upper segment (handle segment) is 50 cm long and has a diameter of 11 mm, the lower segment (tip segment) has a diameter of 8.5 mm. The total length of the cane can be adjusted by replacing the tip segment, e.g. when the child needs a longer cane. Specifications for selected lengths (examples) are listed on page 3.

Price Children's Canes: 85,- €

(Incl. VAT and cane tip, excl. shipping)

Identification Canes Series ZS

Comde-Derenda lightweight Identification Canes series ZS are made from powder-coated aluminum. The individual tube sections are connected by precision conical connectors and can easily be folded to a length of 19 cm for storage. Aided by a built-in elastic cord, the cane can quickly reassemble itself.

All Identification Canes are equipped with skin-friendly beechwood handles with finger grooves. The integrated elastic wrist-strap is also used for fastening the folded cane. The canes are delivered with a finger-shaped tip; all other Comde-Derenda tips can also be used in connection with an adapter.

TYPE ZS15K

Sections: 5
Length: 82.5 cm

Comde-Derenda GmbH

Comde-Derenda GmbH has over 20 years of experience in the development and production of aids for the blind. Customer feedback and cooperation with organizations and experts, such as mobility coaches, are important factors for our production and innovation process. Our white canes and cane tips are manufactured by hand in Germany and Switzerland.

Today's Comde-Derenda GmbH was founded in 1972 as an engineering office in Berlin. Its business object was the development and production of environmental technology devices, such as dust samplers for air quality measurement. In 1992, COMDE GmbH was founded. This company was focused mainly on gas measurement technology for high voltage applications.

Both companies merged in 2012, forming Comde-Derenda GmbH. Our company is located in Stahnsdorf, which is close to Berlin. Our three company buildings are home to all three of our business areas: Gas pressure and density measurement, environmental measurement technology, and aids for the blind. Comde-Derenda GmbH is certified according to DIN EN ISO 9001:2015.
